

my name is laura and I made a project with recyclable material. My project is a crate fair with some flowers of a toy that I don't use anymore and those materials formed a magazine keeper. This can be used to put and organize your magazines, newspapers and other things.

LAURA FIDELIS ALCOLÉA –  
MSGL GRADE 7

My job is a flower pot, it's made of a big bottle and a straw line, it's good because all the materials would be thrown away, and I got to use them for a beautiful job.

MANUELLA ROZETTE PIRES – MSGL GRADE 7

My project is natural, and it is either made of leaves that after being "old", fall from the trees or dry leaves. You must be wondering what it is. It's a pot that you can put on notebooks, stuff to study and the good thing about it is that it's reusable and beautiful and has the same utility as an ordinary pot but the difference is that it helps the environment not polluting and recycling. I made it using dry leaves and simple hot glue.

BEATRIZ FRANCISCO QUARTIM BARBOSA – MSGL  
GRADE 7

My project is a recycled flowers vase. For you to make it, you will need a pet bottle, newspaper, paint of various colors. My project can save the world because it is one more place to plant flowers.

CAROLINA FRALETTI HELÚ – MSGL GRADE 7

In my project I made a reminders frame using a lot of stoppers, a frame and silicon glue, and then I asked to all the students of my class to write some inspiring phrases in a piece of paper to fix in the frame using tacks. My piece of art represent something to a busy person, that sometimes forget to do something important and with this art, this person can put sticky notes about what he need to do during the next day.

Whit my project and my friends projects you can see how simple things that you have at home can turn it into beautiful objects to use in during your day our to decorate your house.

FELIPE MORENO STICCA – MSGL GRADE 7

My piece of art shows that you don't have to spend money on things you can do at home and you can use recyclable materials. My art is simple to make and useful, You can organise your books quickly.

For you to make it, you will only need:

- A box of cereal;
- A tape to make it stronger;
- Paint

If you make a similar project, you will be helping the nature.

ISABELLA AYRES CARDUM – MSGL GRADE 7

My piece of art shows how you can use recycled material. Using recycled material you do not need money. For you to make it, you will only need a plastic plate, green and red paint, googly eyes and green E.V.A, and you can make a frog decoration be beautiful. The recycled material help nature and can save the world because you don't waste money.

LUANA SANTOS FONSECA – MSGL GRADE 7

My project is a box to plant beans and it has water and some cotton to make it, you do not spend anything and it is very good to help the environment. The materials needed to make this box are: a box of ice cream, two bottle bottoms, cotton, water and beans.

MARIA BEATRIZ ALMAGRO POLISZEZUK – MSGL GRADE 7

To build my project I used:

- pet bottle
- tupperware
- a crate
- artificial grass
- earth
- seeds
- water (to water)

First, I cut the bottom of the bottle to form a type of vase, then I put half of the earth that I had brought and the other half I left in the tupperware, in those "vases" that formed I made a hole in the earth, put the seed, covered and watered with water.

The first step is done, now I took the artificial grass (which I had already taken the steps to get easier) and glued it on the crate to be a place for storage.

My project helps the environment because you plant a new area that helps the environment.

LUIZA FIDÉLIS ALCOLÉA – MSGL GRADE 7

My recycled art is a pet bottle that turned into a pencil holder; for you to make it, you will only need scissors, a pet bottle and, if you want, paint and e.v.a as well to decorate it. You will just have to cut the pet bottle and then decorate the way you like and your pencil holder is ready. It shows that to organize our things, it is not necessary to buy anything. Recycling can save the world because it helps the nature that is very degraded.

MARIA LUIZA FERNANDES AYRES – MSGL GRADE 7

In my project I made an organizer box. I made it with black contact paper, tape, hot glue, paint and cardboard. It is good to nature, because we don't have to buy an organizer box, we can make it! And then you don't waste water and other things that are required to make this box. And we don't pollute the nature with the CO2 that cars produce, because we don't have to carry the box up to the store.

PIETRA SIEG GAGLIARDI – MSGLE GRADE 7

My project is a piece of decoration. I used a carton of milk, a 2L pet bottle, a mini pet bottle, adhesive tape and paint. With these materials, I made a camera and I recycled these materials.

TULIO BACH PARRA BRITO OLIVEIRA – MSGLE GRADE 7

My project is a makeup brush holder. My project is made of a shoe box cut in half covered with cardboard with white paper around and hand painted by me.

It helps the world decrease the number of useless shoe boxes.

ANIKE BERTO SILVA – MSGLE GRADE 7

My name is Guilherme and my project is a stickman, to make that, I used: popsicle sticks, bottle caps, newspaper, glue, paper, adhesive tape and some paint.

First I made a simple stickman, then I painted it red and black; after that, I cut a part of the bottle cap and I put the rest of the cap at the "head" of the stickman. At first, I didn't know what I should use as its face, then I looked at a newspaper and saw a guy, so I had the idea to cut his face off and use it as a face. I didn't know how to make it stand still so I got a sheet of paper and used it as base and put newspaper around it, but then... how to make it stand still on the base, I tried fixing him with sheets of paper but it didn't work so I used adhesive tape, it worked, it was done. It can help the nature because it was recycled and the kids who don't have toys to play with, can use it.

GUILHERME HARTKOFF SÃO LEANDRO – MSGL GRADE 7

I used, in my project, glue, some paper pieces and plastic bottles, and these things made my work recycled. I made a pencil case, with painted paper wrapped around the bottle. It is a bad place to put an eraser, because the pencil case is a little deep, so I made an eraser keeper, with sticks and the cap of that bottle. I also made a place where you put the rest of the pencil that you sharpened with a sharpener. It is bigger than normal ones. If you make lots of projects like this, you will reduce your carbon footprint and have a clean conscience.

JOÃO CARMIGNOTTO JELIN – MSGL GRADE 7

My work was a picture frame made with paper and newspaper, in my project there isn't a photo but I will stick a photo of mine or of my family.

My project was made with a sheet of cardboard and a lot of newspaper rolls of various sizes stuck with hot glue.

My picture frame inspire people to recycle, because it is all made with recycled materials and I will glue a photo on it.

KATHERINE CARDOSO CAÇÃO – MSGLE GRADE 7

I made a chandelier from recyclable materials and I did this to show people that everything can be made from recyclable things because you just need energy. My project was made from popsicle stick, barbecue stick, glue and candle. FORCE PEOPLE!!!!!!!

MANOEL CARMIGNOTTO JELIN – MSGLE GRADE 7

My Recycled art project is a Cell phone support, with paper, black and red paint. It is like this:

It is important because a cell phone is something we use everyday, and a recycled support helps to sustain the cell phone and avoid that the material polluting the environment.

MATEUS PINCINATO – MSGLE GRADE 7

My project is made of materials like newspaper, paint, a bottle of tea and white glue wrapping the paper around it, making a flower stem and in a different way to make the flowers petals.

It can help the nature by making people learn that we don't need to trash something " because it can't be used anymore", and people learn that we don't need to buy stuff to garnish our house.

VICTORIA SILVA RAMOS – MSGLE GRADE 7

My work is a plant pot made entirely from recyclable materials like popsticks, cans, plants, and earth.

My work is a good way to show how we can recycle materials like popsicle sticks. An ordinary person would take the popsicle and throw the stick in the trash but a person who thinks about the environment picks up the stick and reuses it. Another good example is an ordinary person would take the can and throw it in the garbage but a person who thinks about the environment picks up the can and reuses it. Another example is the plant; an

ordinary person would pick up the plant that does not flower and would throw it but a person who takes care of the environment would take the plant and take care of it .

VINICIUS ANDRÉ ZIBORDI – MSGLE GRADE 7

My project is about thinks you can do with materials that you have at home. I help a nature by recycling the materials that would be thrown in the trash. To make you need

- toilet paper roll
- paint
- EVA
- googly eyes

TAISPAGLIATO CONSANI – MSGLE GRADE 7
